

TNS Fact Sheet

THE SECRET TO CELEBRITY SKIN!

What makes Oprah sing with praise?

Where did Jennifer Aniston get her glowing skin?

Why does Bo Derek say she no longer needs makeup?

TNS Recovery Complex

TNS=Tissue Nutrient Solution

-For All Skin Types, All Skincare Regimens for revolutionary anti-aging

Cutting Edge Technology:

Derived from wound-healing research where bio-engineered skin was developed for severe skin burns. The derivative of the bio-engineered skin (Derma Graft is now widely used in burn centers) is a complex of human growth factors found in healthy young skin. TNS is comprised of NouriCel-MD which is 10 growth factors and is 93.2% active ingredients of the Recovery Complex. That compares to a typical 5% in store-bought skin care. TNS is only available through medical offices. 93% of women surveyed are repeat clients of TNS!- Try it- you'll like it!

Growth Factors vs. Growth Hormones:

Human Growth Factors work on LOCAL tissue by aiding in growth, healing and regeneration. Human Growth Hormones have a general effect on ALL tissues and organs of the body.

What does it do for you?

This activates your body's own healing mechanisms to reverse sun-damage, stress, and aging. Your skin will begin to heal and put back what time has taken away. Think of a baby's skin that is luminous, plump, and healthy. You will see a difference in your skin's texture, softness, clarity and tone immediately. Over continued use you will see a noticeable decrease in your wrinkles (at least 57% difference!) less redness and irritation (87% difference!) healthier skin and a fantastic adjunct to any other procedures, surgeries, or simply your existing anti-aging regimen!

Recommended use: 2x a day for at least 3 months, maintenance thereafter.
